I recommend the game if you can keep this in a bundle or cheaply. The game looks amazing but some things don't make sense and the story is... odd. It feels like it is not finished properly and there are some bugs. I finished the game but did not get the achievement (odd).

It was a good way to spend my afternoon as I procrastinated on more important things, but there are better HOB games out there.

I have also not found any witches or warlocks.

I am very confused why a lawyer would put sleeping pills into a drink right away. Seems... fishy.. I can crash planes! w00t!. Wow! I'm honestly stunned how fun this is. I am only half an hour deep, but 3 bosses down I feel compelled to recommend this game. I often get bored of typing games fast because that is all it is at its core, but this game's simple movement change up is shocking in depth yet simple. If you are worried like I was on how to move in a typing game don't be as the movement options become second nature quick; maybe 10 minutes or so.

I hate using this term but this feels like the Dark-Souls of typing games. It is hard yet rewarding but I can definitely see how people would find this game hard as it feels almost like real time combat in most bullet-hells and dark souls where there are times to dodge and times to attack. You can SEE yourself getting better as you pull off high combos and inch in words between small windows.

The story is decent enough with very tongue in cheek humor and it doesn't take itself too seriously, but it understands you are here for the game play and that is where it shines.

If you are a fan of hard games, dark souls, bullet hells, or typing games this is for you.. Lacks content. Not terrible, merely mediocre in every respect (except timing - you choose either the nigh-panic-mode real time, which is not particularly pleasant considering the tiny, tiny hitboxes, or the yawn-inducing strategy mode, which honest-to-God has me clicking out to play better, free games online - it takes about ten minutes after beating a level for the screen to finally change over). Cute, but I've played better games with the exact same premise for free. Also, literally every level plays exactly the same. There's no satisfaction from 'accomplishing' anything. In short, don't waste your money on this.. Join American otaku exchange student Brian as he learns about Japanese culture and daily life. He meets two cute girls who explain things and tag along on his various otaku pilgrimages. Japanese School Life explains a lot of really mundane details that even Slice of Life anime would skip over, like shopping at convenience stores vs grocery stores.

The girls are semi-animated during some scenes (swaying, bouncing...) and during other scenes there's talking over a still image. All beautifully drawn. The girls wear different outfits depending on the situation (winter school uniform, summer school uniform, casual, etc.) There's a lot of visual variety.

There's very little interactivity. Auto play advances at a pretty good speed so you can just sit back and watch/read. Not every term is explained fully, so it helps to already know some or be ready to pause and Google anything you don't understand.

As of this writing, achievements do not trigger. If that's important to you, hold off on getting/playing this and see if they fix it.. A nice little throwback to the NES days. It is far too short, though, even for its price tag of \$5. If it's ever on sale, fans of the genre can pick it up for a little over 3 hours of entertainment. Take my advice and play it with an XBox controller or something similar with a comparable D-pad. Watch my full review here:

https://www.youtube.com/watch?v=MHQVUfb_AMM&feature=youtu.be. It's a kids game. A rather good kids game for that matter, puzzles and adventure they'd enjoy well. Tis the only reason I recommend it and please note, I only recommend it for kids. I was bored out of my mind.

This product is AMAZING. I found it extremely easy to get used to. It helped me bring my lame game art to life with ease, which, in turn, allowed me to better my skills at making said game art. Even though I only scratched the surface of its abilities, I was able to do many things with the program. I would definitely recommend this to other gamemaking hobbyists.. totally awesome this game - playing since pre alpha.. It's a good game. Artillery, smoke, Stukas, several campaigns, it's an easy to learn wargame but hard to master. I bought it previously but had some problems running it, I could not get it to close when I exited the game but that has been fixed and now this game runs like a dream. I paid 10 bucks for it, which is a bargain. It's got a ton of content and it's entertaining and challenging. I will probably buy the Kursk DLC in the future.. Shift to kick the bombs, Space to place them.

Stop reading and download it.

Thank me later.. Friends stay WELL AWAY from this one. If you find this in the Steam Store, pack your bags, volunteer your services for the space programme and try and leave orbit. That is how much AWAY i mean by STAY AWAY.

This scam which is a free game on the internet, which always comes with adware and the developer seemed to have sold its soul for that reason.

While the game on Steam is valid and adware free, its greatest scam is making you think that it's a fairly decent racer. IT ISN'T. It's just barely ANYTHING. It's so bodily scarce it's like staring at Calista Flockhart on a diet, during a famine, at a Crystal Meth Party.

The tutorial will tell you the wrong keys, the controls are actually arrows and shift. The customisable options is only change car colour and the racing involves beating 5 other cars on a 3 lap race track. Apparently miss a checkpoint and you have to start the whole thing again as your lap will not count.

There are four tracks but don't worry you will never see the other 3 tracks. The game starts with the other cars being faultless with Star Trek warp drive abilities. By the time you start the other cars will be nearing the finishing line. The background is mainly foggy to hide poor rendering and some of the trees on closer inspection don't seem to be connected even to the ground.

In fact the developer probably made it impossible because there are no other levels, only a hint that there is more than this one level. Why do I say that? Because there is only one soundtrack in the game which will make you want to bury your head in the ground as quickly as possible like your some type of ostrich. You'll head bang the concrete constantly begging the noise to stop.

The worst part is NOT EXAGERATTING. It's REALLY THAT BAD!!!!

The game is made up by this company <http://www.dream-up.eu/> it's a ruse of one person.

[In final the only 4x4 dream i have now comes in the way of a piece of timber and the developers head.](#)

[Below is someone else's play through which will show you the game in all its glory.](#)

<http://store.steampowered.com/curator/6843548/>. Hidden gem alert! Don't sleep on this one. It looks like a regular arcade shooter, but everything about this game escalates quickly and in the most beautiful way. The best two coins you can insert, free play forever.. <https://www.youtube.com/watch?v=cSO-x9yauY8&list=UU7-PLIhjsEBwIQXqKxmNpA>

[The Tower is an adventure action-horror game. This is a low-budget indie game that despite being funded on Kickstarter, and was on Early Access, is selling on Steam with the addendum that any further production has been halted due to lack of funding. They state that they will only add more to the game if they have enough sales. What?!](#)

[The game runs poorly, and the sound is reminiscent of an early 2000](#)

game. The ambient sound overpowers the character narration and plot details. Bugs proliferate throughout, and the plot wanders in pointless directions. The horror aspect of the game is simply in being unable to complete the tasks that you are asked to do. It wastes your time, and lies to you. I would rather hug a porcupine than recommend this game to anyone.
