Same same, only buy if really love the game and just want a little more variety of characters and story. The base game is so fun and such a great value, seems odd an extra character would be 60% of the games price seems a bit off, but on sale I feel its totally worth it.. A decent 2D platformer with a cool idea of limiting jumps.

Though it is damaged by maths taking over obstacles in the game in the form of "puzzles"

If you like maths then you'll love this game but I simply do not

<https://youtu.be/vrlcKQhbRFI>. Not enough Cave, and not enough Men. 0/10. Interesting documentary type experience. Nice visualizations and simple explanations of stuxnet. It included more sliding movement than expected but it didn't induce any sickness. Would've been interesting to see even more about the deployment and early stages of development.. I was expecting to see the Online version of this game, but unable too play it and cannot figure out how to. It is a waste of money and time. Plz get rid of it if not working at all.. Freaky 25 minute experience with some interesting visual techniques - looks great except the eyes of the characters which are flat and lifeless.

Worth the price ? That depends on your interest in VR entertainment and financial situation.. Hello Friends! This dlc pack was a thank you from deep silver to the players of the game when it first came out. It was a apology for the bugs that were released when the game came out. AS most games are released before there finished, that is why this DLC was created. At least they gave you free items for their game when it first came out.

Recommended because it adds new clothing for free!. I wasted a couple dollars and 13 hours on this game.

Basic as they come. Get items, get better items, clear dungeon, yawn. Blah blah blah. It all works, but in the way you'd expect your toaster to work, and I doubt you get excited every morning to find it turning your bread slightly darker.

Its Nice for gameplays For YouTube. I am really dissapointed with the pricing for all the costume DLCs. What I and I believe everyone else was expecting was that buying a pack would give the costmes for both RWBY and JNPR. But instead its per team, making the price almost not worth it. I say almost because I simply cannot turn down Juane in a dress.. Go buy Homeworld. This game is a pale reflection to the glory of Homeworld. I was fine with the story of Nomad Fleet taking cus from Homeworld, but the gameplay, icons, gui, voices, artwork, and even ship design, are all "inspired" by homeworld. This feels like it was released in the 90s.... Great music game similar to Guitar Hero, but with a piano.

This new edition features several new songs to the main campaign, all very enjoyable and characteristic unlike most of the songs from the original's sequel. So more of the same!

Haven't been able to start a multiplayer match yet, but it sounds interesting. It needs better UI though, and it seems like you're only able to join random lobbys, not create your own or join friends. All this I hope is added in a patch, otherwise it seems like a big waste.

The multiplayer has been updated and it is possible to invite friends to lobbies. Now if only I had any cool friends who also liked Frederic.... poor quality, overly repetitive within minutes. Just your Average Basic High school Style run of the Mill VN haha what A good one at that The Mc character Hangs out with people he knows from School and spends His Average daily life Chatting with them. Its Kinda short Routine He goes through School starts Class that is then Break to Talk too each of the 5 Girls You can chat with some choices you can pick are 3 When enough Interaction time goes by it Increases to 5. When The Interaction day is up Theres 25 I think Welll haha Look in title Hint Hint lol But hey in All Good VN Game nice Light hearted and Relaxing ^^ What I totally forget when using this is its security standards. Pretty Neat.
